(54) Title: A METHOD FOR POSITIONING AND A POSITIONING SYSTEM

(57) Abstract: A method for recording a position of at least one component in a location system of a control system of an industrial facility for an industrial process comprises the following steps. The step of creating a model of the facility, including position coordinates for major parts of the facility. The step of storing the model in a location system storage means. The step of identifying a component. The step of placing a mobile information processing device adjacent the component and detecting position coordinates for the mobile information processing device. The step of storing identification information of the component and position coordinates of the mobile information processing device in the location system storage means.
